PPCC 2026: turn conference learning into one governed pilot

Audience: Executive decision-makers
Decision: Recommendation: send a focused team to PPCC 2026 to return with one governed AI, app, and automation pilot charter.

Executive Summary

PPCC 2026 is an upcoming opportunity to connect agents, apps, automation, trusted data, and governance to a concrete executive pilot decision.

Narration

PPCC 2026 is an upcoming opportunity to connect agents, apps, automation, trusted data, and governance to a concrete executive pilot decision.

Recommendation: send a focused business, platform, data, and risk team with one mandate: return with a governed AI, app, and automation pilot charter.

Main conference: October 27-29 at the MGM Grand in Las Vegas. Workshops: October 25-26 and October 30.

PPCC connects agents, apps, automation, and trusted data with implementation, architecture, governance, and AI-driven scenarios.

Ask the team to return with the workflow, owner, trusted data, guardrails, and testable success measure for one pilot. Expansion should depend on that evidence, not conference enthusiasm.

1. Bottom line: send a focused team with one pilot objective

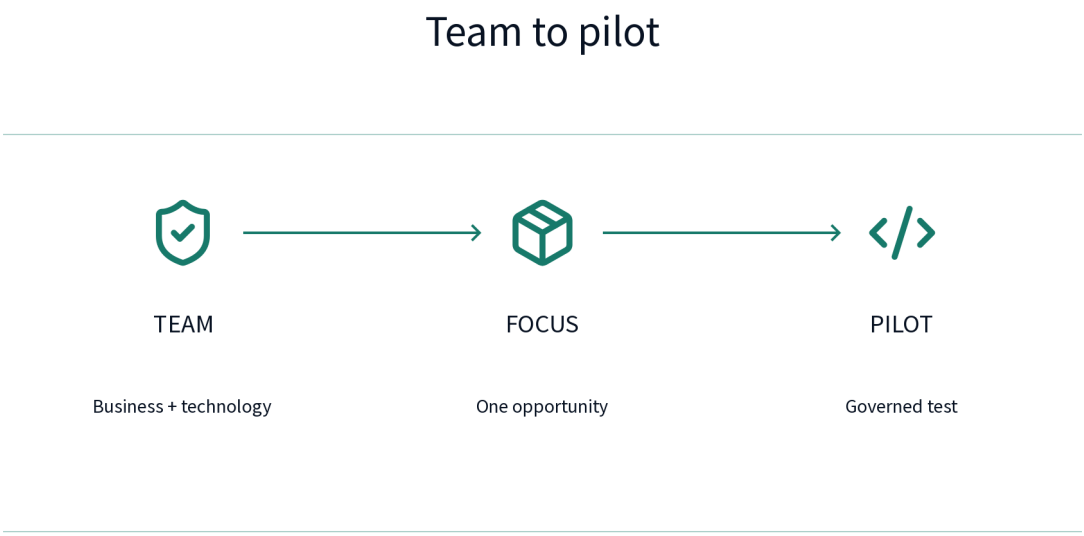

Recommendation: send a focused business, platform, data, and risk team with one mandate: return with a governed AI, app, and automation pilot charter.

Claims

- Microsoft frames PPCC around Copilot, agents, apps, automation, and data.

Assets and alt text

- executive-pilot-team: Three-step executive flow from a focused team to one chosen opportunity and one governed pilot. (embedded image)

Speaker notes

State clearly that this is a recommendation, not a measured outcome.

2. Use the full conference week deliberately

Main conference: October 27-29 at the MGM Grand in Las Vegas. Workshops: October 25-26 and October 30.

Claims

- PPCC 2026 runs October 27-29 at the MGM Grand in Las Vegas.
- Applied workshops run October 25-26 and October 30, outside the main conference.

Assets and alt text

- visual-conference-week: Conference-week timeline: applied workshops bracket the October 27-29 main conference. (mermaid diagram) (embedded image)

Speaker notes

Show the sequence without discussing registration prices.

3. Connect innovation ambition to execution controls

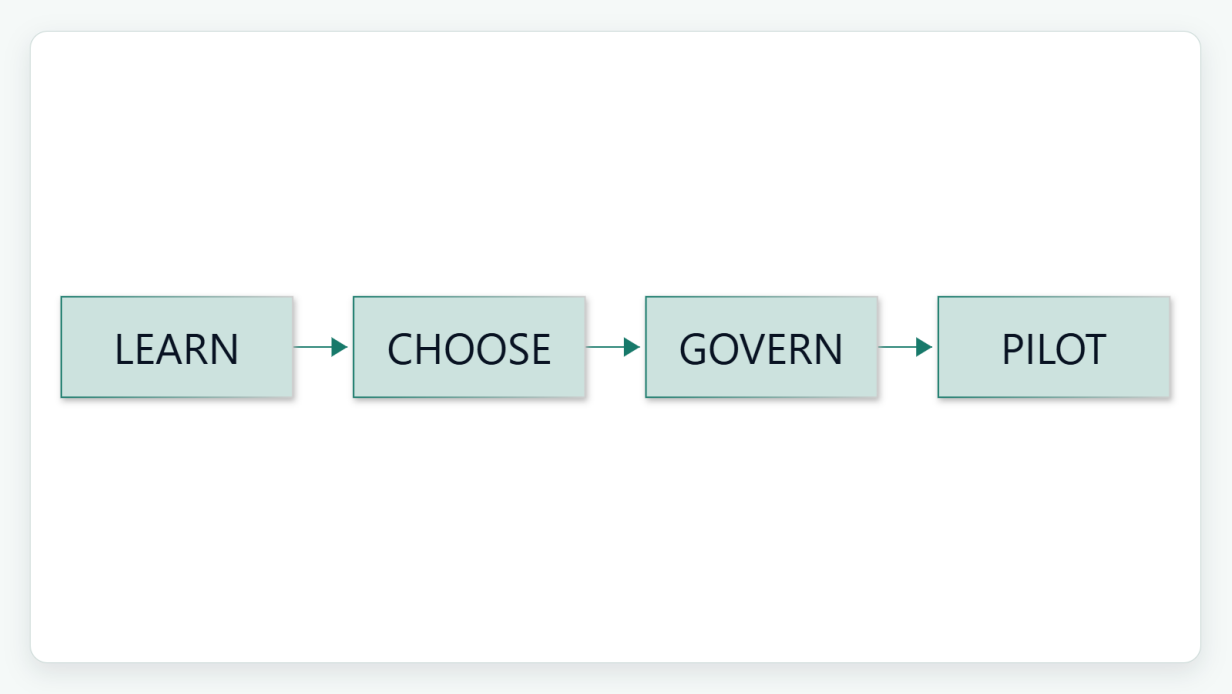

PPCC connects agents, apps, automation, and trusted data with implementation, architecture, governance, and AI-driven scenarios.

Claims

- PPCC covers agents, apps, automation, and trusted data as governed business solutions.
- The FAQ emphasizes implementation, architecture, governance, and AI-driven scenarios.

Assets and alt text

- visual-execution-value: Learning-to-pilot flow: narrow the opportunity, ground it in trusted data, set controls, then test. (mermaid diagram) (embedded image)

Speaker notes

Keep the focus on executive execution rather than a product feature list.

4. Require one pilot charter after the event

Ask the team to return with the workflow, owner, trusted data, guardrails, and testable success measure for one pilot. Expansion should depend on that evidence, not conference enthusiasm.

Claims

- The FAQ emphasizes implementation, architecture, governance, and AI-driven scenarios.

Speaker notes

Close with the proposed deliverable and avoid inventing an owner or deadline.
